

Are you excited about what you do? Did you recently pass the PE or the FE exam? Were you nervous during your interviews, but still managed to knock their socks off? Was your move from college life the workforce an "interesting" path? Do you have any advice for the next generation of Civil Engineers? If you answered yes to any of these questions, then you are just the person we're looking for!

February 17th, the ASCE Younger Member Group will be sponsoring a meeting for the Student Chapter of ASCE at UN-Lincoln. We are looking for a panel (4-8 people) to lead discussions and answer questions on topics such as taking and passing the FE and PE exams, looking for a job, the interview process, the transition from college life to the workforce, any advice or tips, and what we do everyday as engineers. And of course, anything else the Student Chapter would like to hear about.

So, if you are interested in participating in this informal discussion panel, please let me or Marie Maly ([mmaly@schemmer.com](mailto:mmaly@schemmer.com)) know! We can both be reached at 402-493-4800 or [yng@neasce.org](mailto:yng@neasce.org).

Thanks!!  
Lindsay
